# Summary of Proposed Use

The Site was Purchased stating that B.M.B.C were willing to consider B1, B2 & B8 use. This is the use we would apply for to cover this Phase 1 and future Phase 2. (Plus Sui Generis for Section 1)

## Phase 1

The Building would be divided as shown on the enclosed plan

Area 1 would be used for dismantling and disposal of "end of life" cars.

The compound indicated would be fenced off and cars awaiting dismantling and also skips for the recycling materials would be stored in this secure area.

All removal of fluids and stripping down would be done inside the unit.

## Area 2

This area would be used for the servicing of cars - also storage and distribution of new parts.

Cont°

## Area 3

This would be used for Power Measurement and Adjustment of High Performance cars. These tests would be carried out in Sound Proofed Room as indicated.

## Phase 2

Units 4 · 5 indicated would be of similar design and may be split to suit Customer Requirements but would still be in the Class Group B1, B2, B8. A Planning Application to be submitted when this development is to be started.
