3. Description of the Proposal

Please describe the proposed development including any change of use:

The application comprises two wetland habitat creation schemes:

1) Wings Across the Ings (WATI) involves:

- The construction of a wetland on the right hand bank of Bulling Dike containing both reed bed and wet grassland habitats which would be fed by two sources of water.
- Excavation of ground to create wetland area.
- Construction of a series of scrapes through the wet grassland area.
- Construction of control structures and a culvert to direct water to where it is needed to maintain habitat areas.
- Creation of a bund to prevent flooding from Bulling Dike to the west.
- Wet grassland fed by overflow from Broomhill flash to avoid a water deficit through the summer months.
- Reed bed to contain a variety of depths (1m to dry), to encourage a diverse and distinctive variety of habitats and associated species. The design will allow water to be taken from the bulling Dike into the reedbed and released back into the Bulling Dike as necessary.
- Sowing of native wildflower meadows.

3. Description of the Proposal

- Planting of reedbed with locally sourced plant material.

2) Doveside involves:

- Creation of new wetland and wet meadow areas by raising water levels on site.
- Construction of small weir structure within the existing outfall ditch to raise water levels on site.
- Excavation of two scrapes to increase the area of inundation and persistence of standing water in drought periods.
- Construction of bunds and drains to the western and eastern boundaries to ensure water levels outside the site are not raised.

Has the building, work or change of use already started? Yes No
