

- LEGEND**
- Existing open water
 - Existing woodland / scrub to be outside proposed areas of inundation
 - Wet woodland to be formed by inundation of existing woodland
 - Proposed wet meadow / marginal wetland
 - Proposed wetland
 - Retained neutral grassland
 - Woodland/scrub outside site boundary
 - Proposed scrape area
 - ▲ Existing surface water discharge
 - Proposed weir
 - Proposed bund
 - Existing drain
 - Proposed drain
 - Site boundary

Western drain diverted into new drain and culvert

Proposed culvert with flap valve to stop water ingress from river

Dropboard weir set at 22m AOD. Use of drop boards will allow adjustment of water levels; if required water levels can be lowered to the same levels as prior to construction

Proposed culvert with flap valve to stop water ingress from river

Bund, drain and new outfall will ensure the wetland does not raise water levels within the landfill

Repaired stock-proof fencing to boundaries

Bund, drain and new outfall will ensure the wetland does not raise water levels within the landfill
