

8' x 8' Clifton

The Clifton

Especially designed for the quiet, peaceful, sunny corner in your garden, the pretty Clifton is available in five sizes. The external walls, roof, windows and doors are all made from premium clear grade Western Red Cedar. The warm and stable Cedar contains it's own oils and preservatives making it a naturally durable and rot resistant species of timber, perfect for a garden summerhouse.

The Clifton has four opening windows and a set of locking double doors. Windows and doors can be either georgian or leaded style. All window and door furniture is high quality solid brass. The roof is tiled with Western Red Cedar roof shingles. The exterior receives a primer coat, followed by two coats of opaque, breathable colour finish with twelve different colours to choose from. Internally the Clifton is lined with patterned medium density fibreboard which receives two coats of your chosen decorative colour finish. The Clifton comes with a redwood (pine) tongue and grooved floor which can be upgraded to a hardwood tongue and grooved floor or one of our tiled effect laminate floors, if preferred.
