Electricity Act 1989: Overhead Lines (Exemption)(England and Wales) Regulations 2009

It is proposed to undertake the following work that is considered to be exempted from the Electricity Act 1989 by falling within the Overhead Lines (Exemption)(England and Wales) Regulations 2009:

Land at Snowden Hill, Oxspring - diversion work to place underground 3 x sections of existing overhead line.

Particulars of proposed development to be completed by Applicant:

National Grid have a major scheme to re-furbish there 450,000v pylon line, 4Z00, in 2017. As a result of this work, Northern Powergrid are required at certain locations to protect any under running assets by placing them underground. This is both for safety reasons and also to protect customers supplies when National Grid are carrying out there work. Line W0130, indicated on the attached plans, currently passes under spans 4Z00127-129 of National Grids line. It is planned to recover the overhead spans from pole 6 to pole 3 and install a new terminal pole 3A at the location indicated at the field edge. Additional pole 3A will be no higher than existing poles on this line. These works are deemed as minor by The Department of Energy and Climate Change and therefore fall within the exemption regulations.

The Council/Authority is requested to indicate that it has no objection to the work being carried out by returning two copies of this Form with the Certificate completed and signed.

Yours Faithfully

For and on behalf of the Applicant
