Statement relating to measures to prevent mud, grit and dirt being carried onto the public highway in accordance with planning Condition 6 Construction Method Statement on the planning approval NO 2017/0577 to Land Off Newland Avenue and Carrs Lane, Cudworth, Barnsley.

The main access of the site connects directly to Carrs Lane therefore cleanliness of vehicles and plant travelling between the site and the main road is an important consideration. This means that action needs to be taken to prevent mud or other debris from leaving the construction site and getting onto the highway. In this instance several measures are being implemented by the developer.

Firstly road signage erected for the duration of the construction period will be placed either side of the site entrance as shown on the Construction Plan. The signs will be standard construction warning signage reading 'Slippery Road' with 'Mud on the Road' sub plate.

Further to this a power washing area will be installed behind the main compound alongside the delivery access road so that any vehicles leaving the site that require it can clean their tyres and undercarriage to wash off mud and debris before they exit. Similarly a power washing area will be installed on the main site road near the site entrance so that other construction vehicles exiting can also be cleaned down before entering the public highway. The locations for both facilities will be shown on the traffic management plan. All vehicles will be inspected prior to leaving site to ensure limited mud will be placed on the carriage way

Lastly a road sweeper vehicle will be employed to visit site and clean the site roads each day to prevent a build-up of mud, grit and dirt. This will take place every afternoon prior to the close of site and will also be on

NO TRAFFIC IS TO EGRESS ONTO NEWLANDS AVENUE
