Be prepared

The location you have selected is in an area which fell outside the extent of the extreme flood, at the time of our assessment of the likelihood of flooding. Generally this means that the chance of flooding each year from rivers or the sea is 0.1% (1 in 1000) or less. The Flood Map shows our current best information on the extent of the extreme flood from rivers or the sea that would occur without the presence of flood defences.

For a fuller explanation of flood likelihood, [click here](#).

Be aware:

- Our maps only cover flooding from rivers and the sea. Flooding can occur at any time and in any place from sources such as rising ground water levels, burst water mains, road drains, run-off from hillsides, sewer overflows etc. [Click here to find out more.](#)
- To find out how to be prepared for all types of flooding go to our Floodline pages or call Floodline on tel: 0845 988 1188.
- The information on the likelihood of flooding is not intended to be used by people applying for planning permission for new developments. To find out how the Flood Map can help when planning a new development, [click here](#).
