Colour

Pantone 187EC

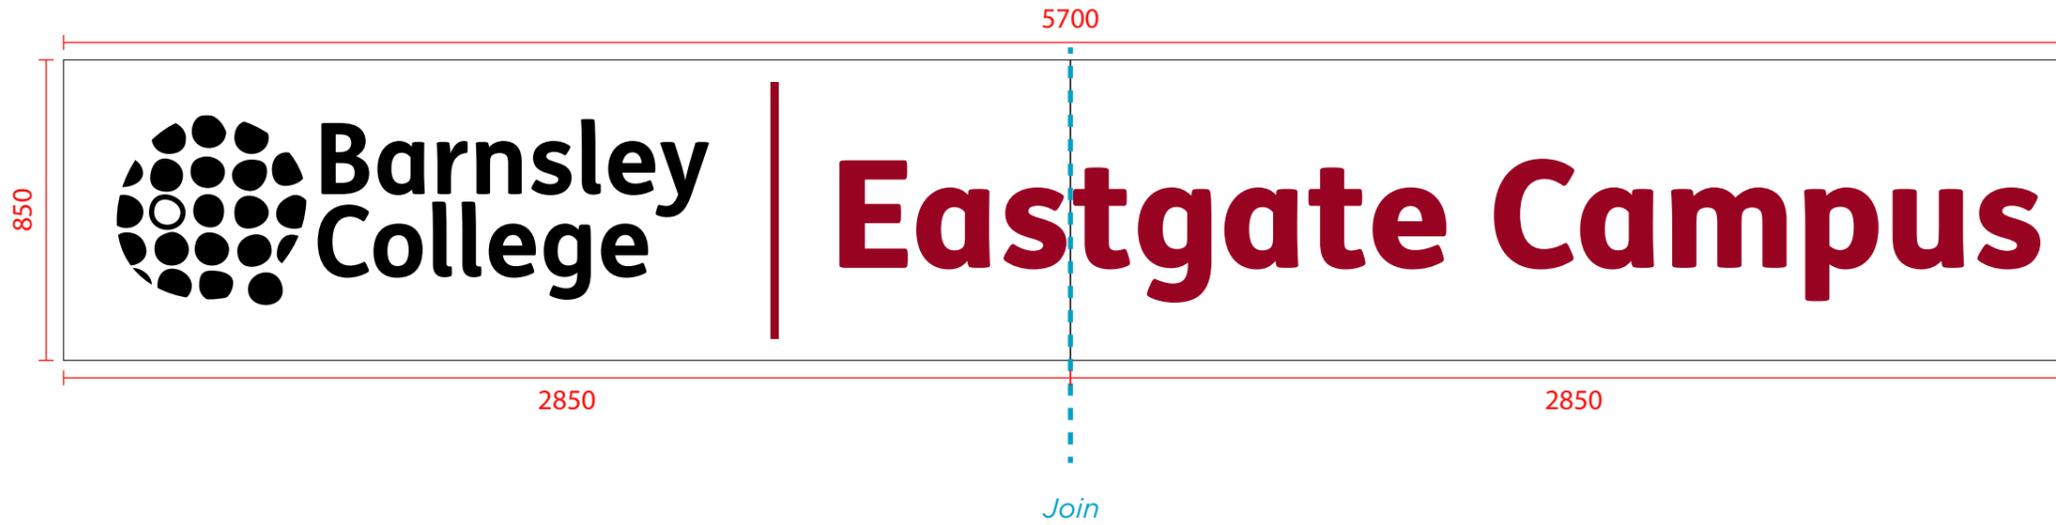

Font

FS Me - Heavy

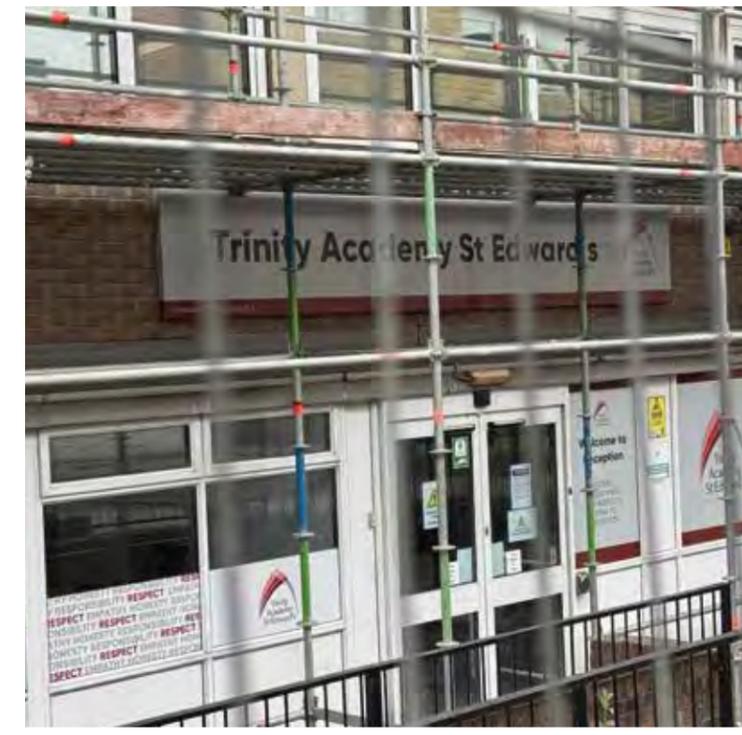

Fixing

Screw fixed to wall with aluminium angle fixing rails

Sign 3 - Back External Sign Tray

Remove existing signs

Notes: The scaffolding will need to be up still for us to install it, the scaffolding is coming down mid August.

We will still need a step up on the scaffolding to install the sign, the construction contractor said that they would board out this area, so that we can't fall over the scaffolding. Install the new sign above the plug socket and wires.

Rear Sign Only - Remove existing signs
