# VIEWPOINT LOCATIONS FOR VISUALISATIONS

## OVERVIEW MAP

### VIEWPOINTS

The following viewpoints have been selected in conjunction with Barnsley Council for which to prepare visualisations.

- C: Off Welland Court (view south east)
- E: Cannon Way
- H: Darton UD 12 footpath, near to junction with Hermit Lane (view north west)
- J: Junction of Dury Farm Court and Barnsley County Borough Footpath 248
- L: B6131 Darton Lane
- N: M1 motorway
- O: View from High Hoyland
- S: Mapplewell
- T: Swallow Hill Road
- U: Lidgett Road

3D massing montages have been prepared, in line with Visualisation Type 3 and AVR Level 1 of the latest guidance<sup>1</sup>. The montages provide an understanding of the location, size, and degree of visibility of the proposed development, showing the massing of the proposed development. They are presented at operation year 1, year 5, and year 15 to demonstrate the beneficial effects of the maturing of landscape proposals/ mitigation.

The massing montages present a worst case scenario of the proposed development with the built form modelled based on the Parameters Plan. Proposed built form, woodland planting, and the link road are shown as colour overlays on viewpoint photography. No amendments have been made to viewpoint photography ie no existing vegetation, built form or infrastructure has been removed or changed. Where existing vegetation would screen views to the proposed development, the colour overlays have been removed from these areas so that the effect of existing screening can be seen. The exception is Viewpoint E, where not enough detail about proposals is known so the proposed development extents are simply overlaid on the photo.

The following method was followed for the preparation of massing montages:

- Extents of proposed built form are modelled based on the maximum heights and layout of development as shown on the Parameters Plan. Extents of proposed Woodland Planting Mix are modelled based on the extents shown on the Landscape Masterplan.
- Existing terrain data at 5m intervals has been used for topography outside the application site boundary, and proposed topography within the application site boundary has been designed to 1m intervals. Proposed topography has been merged with existing terrain data and as such the proposed site levels are taken into account for the massing montages. This has been undertaken in Revit. Proposed built form and proposed planting heights were also modelled in Revit.
- Terrain data and proposed built form were added to TrueView Visuals to provide a representation of the modelled view against the viewpoint photography. Views were exported from Trueview Visuals to Adobe Photoshop and a colour wash given to proposed built form and proposed planting.

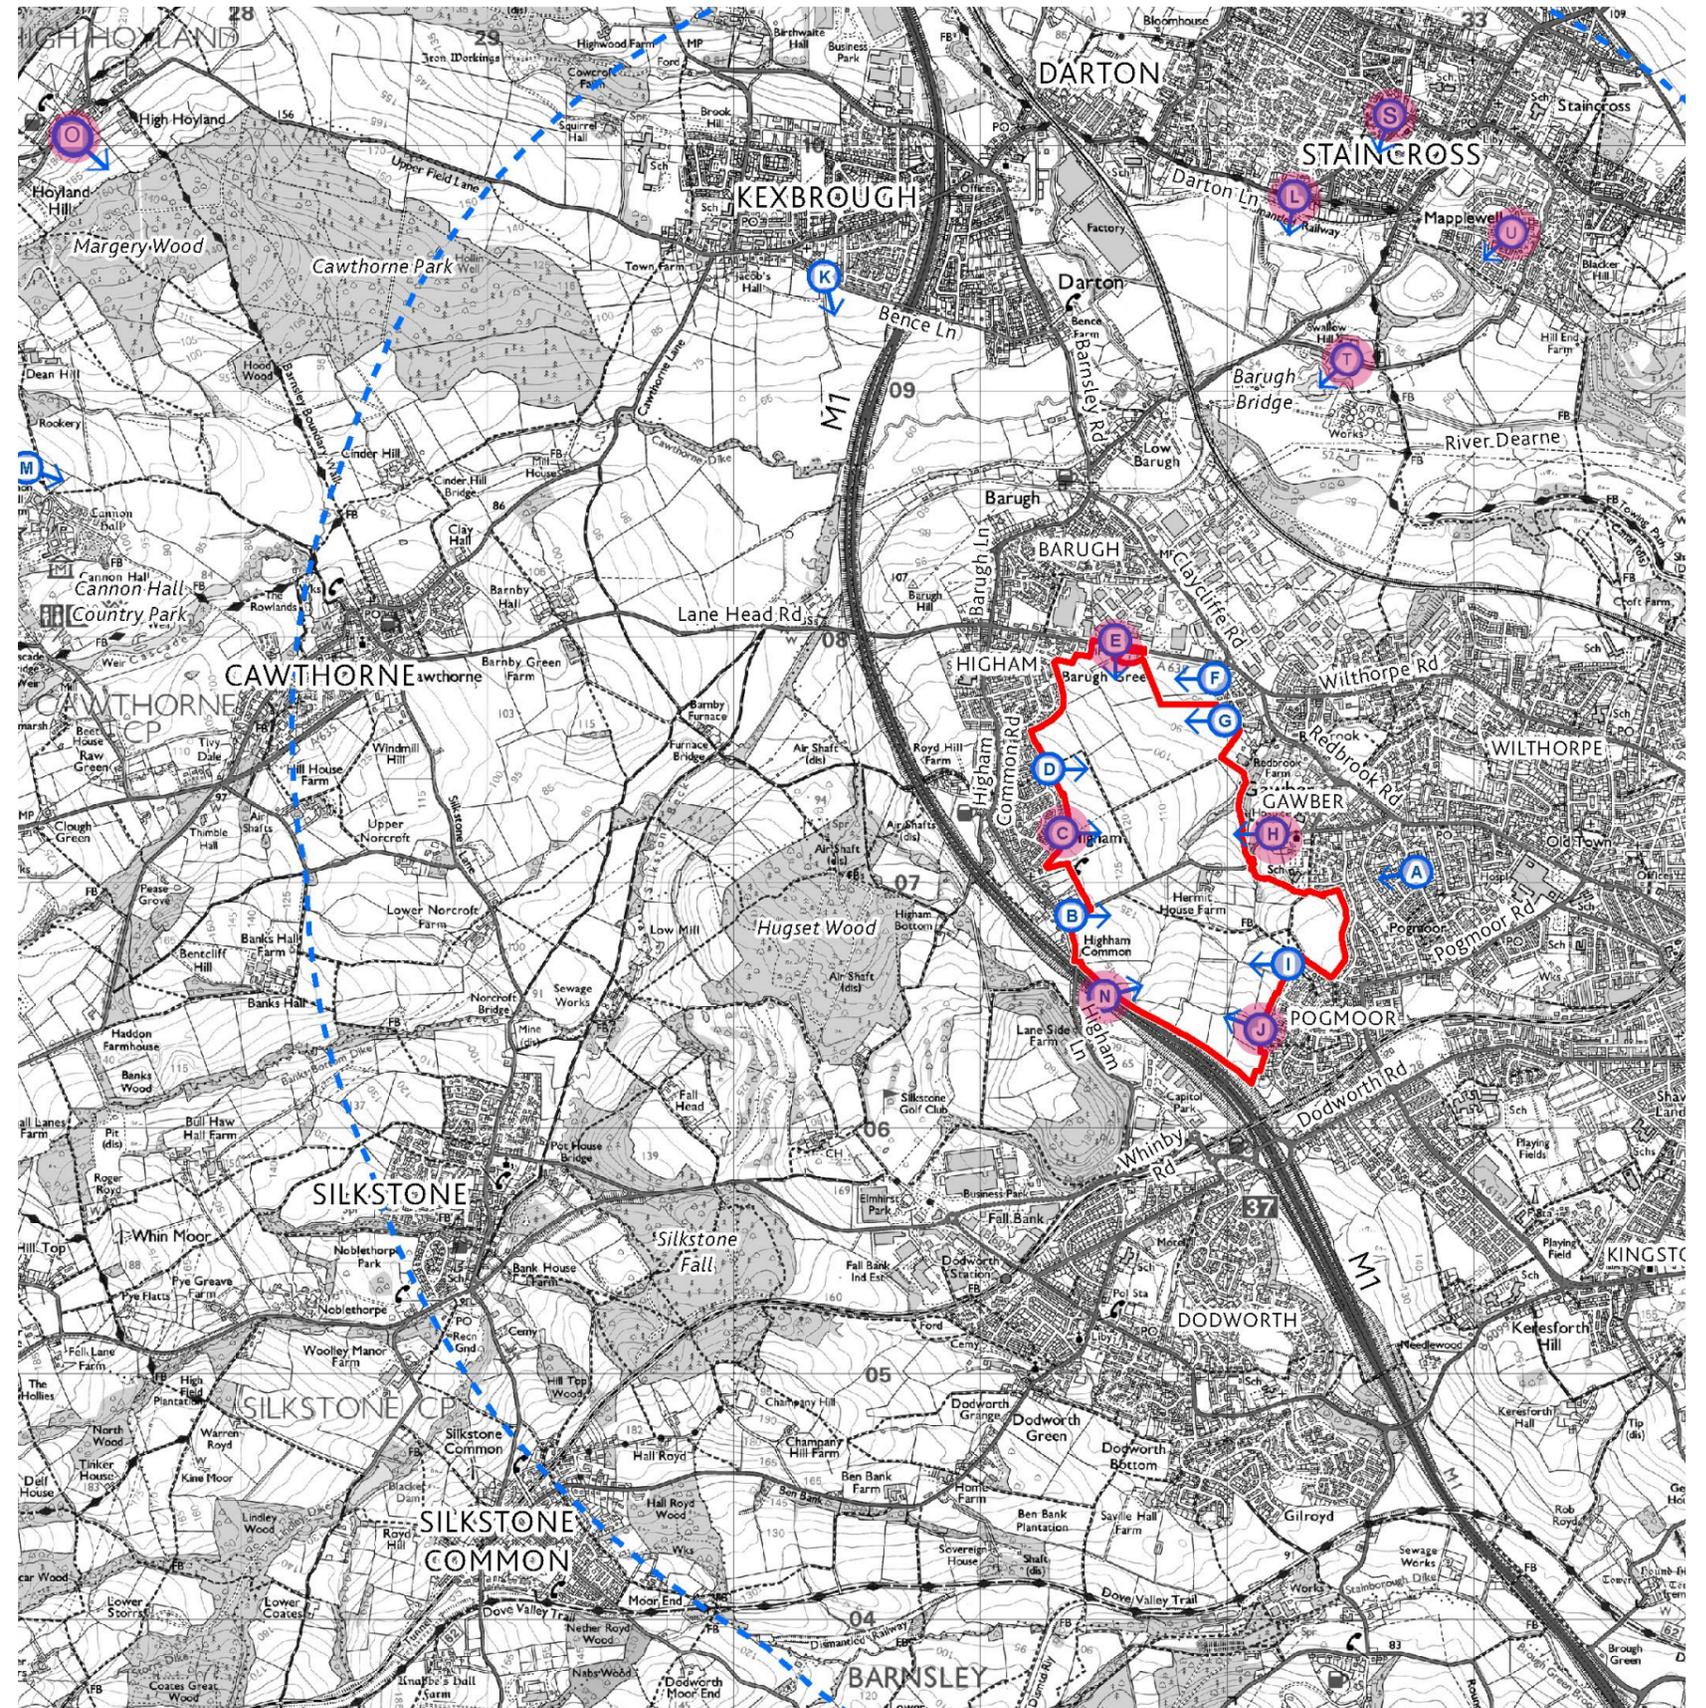

FIGURE 1: VIEWPOINT LOCATION MAP

# VIEWPOINT C

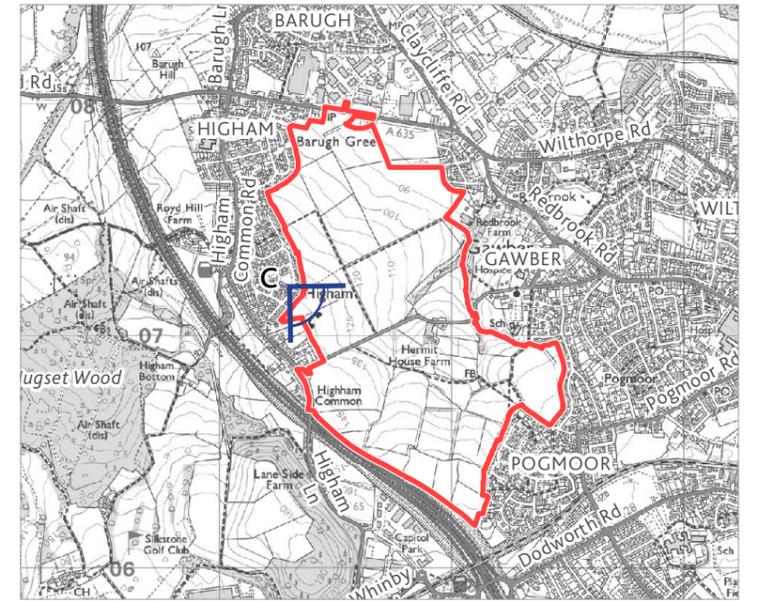

## OFF WELLAND COURT (VIEW SOUTH EAST)

Grid Reference: E 431296 N 407264

General Direction of View: South East

Approx Elevation: 13m

Approx. Distance to Proposed Development: 100m

LOCATION MAP

### BASELINE PANORAMA - 90° HORIZONTAL FIELD OF VIEW

Photographs taken with a Canon EOS 6D, Canon EF 50mm f/1.8 fixed focal lens on 09.02.2023

## OFF WELLAND COURT (VIEW SOUTH EAST)

- COMMERCIAL
- RESIDENTIAL
- EMPLOYMENT

**EXTENTS OF PROPOSED BUILT FORM**  
Proposed development built form is modelled based on the maximum heights and layout shown on the Parameters Plan

**EXTENTS OF PROPOSED PLANTING**  
Proposed planting is modelled based on the extents of planting shown on the Landscape Masterplan and heights shown are representative of planting at Year 1, Year 5, and Year 15

**EXTENTS OF PROPOSED ROUNDABOUT & LINK ROAD**  
Proposed road layout is represented based on the layout shown on the Parameters Plan

MASSING MONTAGE OF PROPOSED DEVELOPMENT AT OPERATION YEAR 1

MASSING MONTAGE OF PROPOSED DEVELOPMENT AT OPERATION YEAR 5

MASSING MONTAGE OF PROPOSED DEVELOPMENT AT OPERATION YEAR 15

# VIEWPOINT E

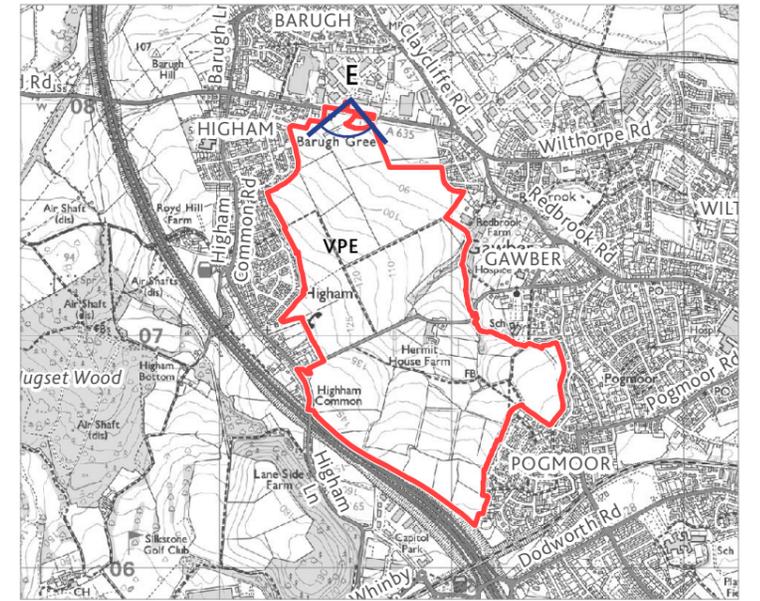

## CANNON WAY

Grid Reference: E 431563 N 408023

Approx Elevation: 85m

General Direction of View: South

Approx. Distance to Proposed Development: 25m

LOCATION MAP

### BASELINE PANORAMA - 90° HORIZONTAL FIELD OF VIEW

Photographs taken with a Canon EOS 6D, Canon EF 50mm f/1.8 fixed focal lens on 17.03.2021
