Subject: Local Flood Stores - Planning Application (Burton Grange)

Hi Matt,

Here is the Design and Access Statements for the Flood Store in the Burton Grange area;

- **Burton Grange, within the Community Centre Site –** The colour of the container will be green and positioned in an area considered to minimise any visual effect and/or the physical obstruction that may be caused in any way to local residents or users of the Burton Grange Community Centre. This was agreed following consultation with local residents groups and representatives of the local community partnership.

- **Design –** The storage container is constructed of mild steel and the dimensions of the unit is 10ft (long) x 8ft (wide) x 8ft6" (high), there are no windows and two full length doors at one end and is secured via a padlock mechanism which is housed within an anti-vandal locking box.
- **Access –** To the storage container will be via the public footpath in to the Burton Grange Community Centre.

Please arrange for this application to be processed and attribute the associated costs to the following [redacted] The planning application form and associated documents will follow in hard copy. Many thanks. Cheers ~ Derek
