The Hut, Wombwell. Arboriculrural Statement

The Hut has a number of mature trees which have preservation orders that we have been made aware of. It is our intention to ensure the trees are well maintained and preserved in their current state. As necessary any tending/pruning will be undertaken in a regular basis, subject to guidance and kept in their current state.

Currently the grounds are grassed but due to the additional parking demands some of the grassed area will need to be removed therefore we propose the following:-

- All trees to be left as is and maintained
- An area of grass from the front entrance to the parking areas to be removed to reveal the existing hard standing below (This exists due to it being a former parade ground for the Scouts). This would create a route to the parking bays which would again be marked by removing the existing grass and topsoil. (Please see accompanying plan tom show the area).

We wish to keep as much of the grassed area as possible to keep the existing look & feel.
